CAREER OBJECTIVE

MCA student with strong foundation in Java, JSP/Servlet, PHP, and MySQL, seeking an entry-level Software Developer role where I can apply my problem-solving skills and hands-on project Experience to build scalable and real-world applications.

EDUCATIONAL QUALIFICATION

Qualification	Institution	University/Board	Year of Passing	Percentage/CGPA
MCA – Part I	KIT Kolhapur	Shivaji University	Pursuing (2025)	—
BCS	New College Kolhapur	Shivaji University	MAR 22 – APR 25	70.9%

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, C#, python, PHP.
 - **Web Technologies:** HTML5, CSS3.
 - **Database:** MySQL
 - **Frameworks :** Java Swing, C#, .Net
 - **Tools&IDEs:** GitHub, Eclipse, Apache NetBeans, Visual Studio Code
 - **Server:** Apache Tomcat, Xampp
 - **OperatingSystems:** Windows, Linux
-

ACADEMIC PROJECTS

🚩 1. Title: [Library Management System](#)

Description:

The Library Management System is a desktop-based application developed using Java Swing and MySQL to automate core library operations. The system enables efficient management of books, members, and transactions by allowing librarians to add, update, delete, and search records easily. It also supports book issue and return functionality with due-date tracking and defaulter identification, ensuring accurate record maintenance and reduced manual effort through JDBC-based database connectivity.

TechnologiesUsed: Java (Swing), MySQL, JDBC

🚩 2 . Title: [Expense Tracker Web Application](#)

Description:

The Expense Tracker is a web-based application developed using HTML, CSS, JavaScript, PHP, and MySQL to help users manage their daily and monthly expenses effectively. The system allows users to register and log in securely, record expenses under multiple categories, and automatically calculate spending summaries. It also provides detailed reports with PDF download functionality and includes a Free, Pro and premium plan-based feature system, ensuring a responsive and user-friendly experience across devices.

TechnologiesUsed: HTML, CSS, JavaScript, PHP, MySQL

🚩 3. Title: [Daily Orders Web Application](#)

Description:

The Daily Orders Management System is a web-based application developed using PHP, MySQL, HTML, CSS, and JavaScript to manage daily customer orders, payments, and billing records efficiently. The system allows order entry date-wise, customer-wise tracking, and automatic calculation of total amounts, profits, and pending dues. It also provides monthly reports, payment history tracking, and secure admin access to ensure accurate and organized data management. The application is fully deployed and hosted online, enabling real-time access and demonstrating practical experience in live project hosting and server deployment.

Live Project: <https://dailyorders.page.gd>

Technologies Used: HTML, CSS JavaScript, PHP, MySQL

CERTIFICATIONS & INTERNSHIPS

- **Python Programming Internship – iBase Technologies (Online, 7 Days)**
 - Learned Python basics, control structures, and file handling. Developed a mini project on *Train Ticket Booking System* for practical implementation.
 - **Disha Computer Certificate (ISO Certified certificate):**

Completed multiple programming certifications with the following grades:

 - C (65%) C++ (80%), Core Java (75%), Python (95%), HTML (100%)
 - **New Horizon 2K25 (College Technical Event):**
 - Participated in State-Level Programming Skill Competition held at New Horizon 2K25, representing college in coding category.
-

CO-CURRICULAR & EXTRA-CURRICULAR ACTIVITIES

- Participated in State-Level Programming Skill Competition
 - Developed multiple academic projects including Library Management System and Daily Expense Tracker
-

DECLARATION

I hereby declare that all the information provided above is true to the best of my knowledge and belief.

Place: Kolhapur

Date: 07/02/2026
